COMPANY OVERVIEW

Machining USA, LLC is a Florida-based contract manufacturer providing precision CNC machining services for industrial customers and government supply chains. Led by more than 35 years of machining and manufacturing experience, we emphasize dependable production, dimensional accuracy, clear communication, and repeatable results.

CORE COMPETENCIES

- Precision CNC turning and production machining
- Repeat orders and medium-to-high-volume production opportunities
- CAD/CAM programming, process planning, and manufacturing support
- Dimensional inspection using calibrated measuring equipment
- Machining support for aluminum, stainless steel, steel, brass, and engineering plastics (subject to drawing review)

INDUSTRIES SERVED / TARGET MARKETS

Industrial equipment • Fluid power • Automation • Transportation • Energy • Aerospace and defense supply chains (as applicable to project requirements)

QUALITY & PROCESS CONTROL

Documented inspection procedures, measuring-equipment calibration, and in-process verification support consistent part quality. Quality Management System information is available upon request. ISO 9001 certification is a goal targeted for December 2026; Machining USA is not represented here as currently ISO 9001 certified. AS9100 and ITAR are future considerations.

WHY MACHINING USA

- 35+ years of precision machining and manufacturing leadership
- Emphasis on production repeatability and practical manufacturability
- Responsive RFQ communication and drawing-based quotations
- U.S.-based manufacturing and support for subcontract production

COMPANY / GOVERNMENT DATA

CAGE Code: 86MG4 | **NAICS: 332710 — Machine Shops**

SAM.gov registration status and additional representations should be verified before government submission.

REQUEST A QUOTE

Send 2D drawings or 3D CAD models, material specifications, estimated quantities, inspection requirements, and requested delivery dates to quotes@machining-usa.com.
